Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #38304
Military Health and Well-Being Project, United States, 2020

1. Variable Differences:

- a. The following variables are present in the data but are not documented in the P.I. Codebook; no further information was provided.

- | | |
|---------------------------------|-------------------------------------|
| • STARTDATE | • RECIPIENTEMAIL |
| • ENDDATE | • EXTERNALREFERENCE |
| • IPADDRESS | • LOCATIONLATITUDE |
| • PROGRESS | • LOCATIONLONGITUDE |
| • DURATION__IN_SECONDS__ | • DISTRIBUTIONCHANNEL |
| • TIME | • USERLANGUAGE |
| • TIME_FLAG | • Q_RECAPTCHAScore |
| • FINISHED | • Q_RELEVANTIDDUPLICATE |
| • RECORDEDDATE | • Q_RELEVANTIDDUPLICATEScore |
| • RESPONSEID | • Q_RELEVANTIDFRAUDScore |
| • RECIPIENTLASTNAME | • Q_RELEVANTIDLASTSTARTDATE |
| • RECIPIENTFIRSTNAME | • VETERAN |

- b. The variable **STATUS_A** in the data is documented as **STATUS** in the P.I. Codebook. The actual variable **STATUS** in the data is not documented in the P.I. Codebook; no further information was provided.
- c. The variable **CES_TOTAL** in the data is not documented in the P.I. Codebook. Please see the supplemental syntax available for download in the zipped package for additional information on how this variable was constructed.

2. Value Label Discrepancies:

- a. The variables **PUBLIC_1**, **PUBLIC_2**, **PUBLIC_3**, **PUBLIC_4**, and **PUBLIC_5** contain unlabeled values in the dataset. The labels for these values can be found in the P.I. Codebook. For the user's convenience, the value labels are also listed below.
- 1 = Strongly disagree
 - 2 = Disagree
 - 3 = Neither agree nor disagree
 - 4 = Agree
 - 5 = Strongly agree
- b. The value labels for the variables **CONSENT**, **CES_5**, **CES_6**, **CES_7**, **WHO7**, **WHO8**, and **WHO9** in the data do not match their value labels documented in the P.I. Codebook; no additional information was provided.
- c. The variables **STATUS** and **FINISHED** contain undocumented values; no additional information was provided.
- d. The values of the reverse-coded variables (e.g., **MISSSF_5R**) are not labeled in the data. Please see the P.I. Codebook and the supplemental syntax available for download in the zipped package for additional information on variables that were reverse-coded.

3. **Truncated Labels:** The data contain several variables with truncated labels. Please see the P.I. Codebook for complete labels.
4. **Syntax Discrepancies:**
 - a. The P.I. Codebook indicates that the variable **STRESS_COUNT** is the “count of number of stressful events reported”, and there are seven **STRESS_#** variables in the data file. However, according to the supplemental syntax file “scalescoring8.31.do”, which is available for download in the zipped package, the variable **STRESS_6** was not used to compute the variable **STRESS_COUNT**; no additional information was provided.
 - b. Users should take caution when using the variables **SOC_INTEGRATION_1R** and **SOCINT_MEAN**. According to the supplemental syntax file “scalescoring8.31.do”, the variable **SOC_INTEGRATION_1R** was computed using **SOC_CONTRIBUTION_1** instead of the expected variable **SOC_INTEGRATION_1**. The unexpectedly computed **SOC_INTEGRATION_1R** was then used to compute **SOCINT_MEAN**; no additional information was provided.

ICPSR 38304

Military Health and Well-Being Project, United States, 2020

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
